

Crystal Brook is on the map

Crystal Brook is an idyllic country town in South Australia, with a strong community spirit but two major Port Pirie Regional Council projects are putting this peaceful town on the map.

A new nature playground has been constructed at Bowman Park, on the outskirts of Crystal Brook. Nature playgrounds are increasing in popularity and the Climbing Tree Nature Play designed space has been recognised as #2 in Nature Play South Australia's Top 10 Best Adventure and Nature Playgrounds.

Bowman Park has its own magnificent history as a former fauna park and event space and this natural wonder has been revived since the Nature Play Space officially opened in June.

Bowman Park Nature Play Space is a collaborative project between Port Pirie Regional Council and the Bowman Park Management Committee and has been funded through the Federal Government's Drought Communities Program.

The playground features interactive structures and landscapes for children to explore such as pathways, log scrambles, build your own cubby, balance logs, treasure hunt, tunnels and soft fall.

Bowman Park Nature Play Space, a new interactive nature playground for Crystal Brook.

Drive back into the heart of Crystal Brook and you will notice a major transformation in Bowman Street, the town's main street and shopping hub.

The works are well underway and include new seating made from recycled timber slats, the installation of a new shelter in the centre median, bike racks, new irrigation and landscaping, kerb repairs and the resealing of the road and car parks.

These works have been made possible with funding from Port Pirie Regional Council's Capital Works program,

together with funding sourced from the Federal Government's Drought Communities Program Funding Round 2 and the State Government's Places for People program.

Crystal Brook's nature playground and improved main street will draw on the great tourism benefits expected from the State Government's \$10 million Remarkable Southern Flinders project which will see the development of walks around nearby Napperby/Nelshaby that are set to be equivalent to the Grampians experience.

Shovel ready essential services make headway during COVID-19*

In light of COVID-19, stimulus plans are being rolled out to sustain businesses across the nation.

The construction sector is a key focus, placing shovel ready projects in the limelight to help revive our slowing economy.

With its crews on the frontline, specialist in water infrastructure, Interflow, has been spearheading shovel ready essential services for their customers and communities.

Providing end-to-end solutions for water networks across Australia and New Zealand, Interflow is a self-performing contractor, employing over 600 people to plan, design, construct and maintain pipeline infrastructure across the 4 Waters.

Ready to mobilise

COVID-19 has compelled essential service providers like Interflow to develop swift and innovative ways of meeting the nation's water infrastructure needs.

The Company's crews are constantly on the frontline, building magnificent feats of engineering.

As such, the ability to rapidly respond to urgent infra-

structure needs is now more important than ever.

Interflow's Business Development Manager – Western Australia, Steven Paradiss, emphasises how shovel ready projects can boost the economy.

"Our team's ability to hit the ground running will enable us to build and renew essential water infrastructure as Australian communities begin to slowly reopen."

Harnessing innovation during COVID-19

As an essential service provider, Interflow has adapted quickly to evolving restrictions and 'the new norm'.

When looking at this flexi-

bility through a smart spending lens, the Company consistently develops end-to-end solutions that breathe life into customers' water infrastructure networks for generations to come.

"We take a holistic approach to solving our customers' problems.

"If customers have an emergency, we're here.

"If they need a bespoke solution, we can design it, and if they need a long term plan that will get the most value out of their stimulus plans, we'll help them."
